

CORAVİN PROGRAMI / *CORAVIN PROGRAMME*

Coravin iğnesi, şişedeki şarabı oksijene maruz bırakmadan bir kadeh şarap dökmenizi sağlar.
Hızlı oksidasyon önlenir. Şişedeki şarap açılmamış gibi yavaşça olgunlaşmaya devam eder.
Bir şişenin mantarını çıkardığınızda şarap hızla oksitlenmeye başlar.

*The Coravin's needle allows you to pour a glass of wine without exposing the rest of the bottle to air.
Rapid oxidation is avoided. The wine in the bottle continues to age slowly as if it had never been opened.
When you remove a bottle's cork, the wine rapidly begins to oxidise.*
